Full-stack developer focused on building fast, scalable, and user-focused applications using Next.js, TypeScript, AI, and Web3 technologies. Currently pursuing Electronics and Computer Engineering at Amrita Vishwa Vidyapeetham and actively building projects across frontend engineering, blockchain, and machine learning with a strong focus on real-world execution and product quality.

EDUCATION

B.Tech Electronics and Computer Engineering , Amrita Viswa Vidyapeetham, Bengaluru
CGPA - 7.27
Sept 2023 - Present

SKILLS

Frontend Development: NextJS, React, TailwindCSS

Blockchain & Web3: Solidity, viem, Foundry, Hardhat

Backend & Databases: Node.js, PostgreSQL, Prisma

Design Tools: Figma

Tools: Git, Docker, Vercel, Linux

AI/ML: TensorFlow, PyTorch, OpenCV

Other Languages: C/C++, Python, TypeScript, JavaScript

INTERNSHIP

GRC Analyst Intern | Cybersecurity-NXXT | Jun 2025 - Jun 2025

- Learnt about Governance, Risk and Compliance and ISO27001
- Made my own Risk Assessment Sheet and did a sample Risk Assessment based on ISO27001

PROJECTS

Neural State Cryptography | Under Dr. Sunitha R , Amrita Vishwa Vidyapeetham | July 2023 - Present

- Co-developed a novel cryptographic seed generation system using EEG and EMG physiological signals for high-entropy random number generation, leading to a university **Patent** disclosure.
- Built a signal processing pipeline combining nonlinear entropy analysis, chaotic dynamics, and SHAKE-256 to generate cryptographically secure random bitstreams.

Folio 2k26 - My Personal Site | 2026 | [Link](#)

- Designed and developed a fast, responsive portfolio with product-level polish clear navigation, consistent UI sections, and performance-first architecture
- Deployed on Vercel with optimized build pipelines for seamless delivery

bi0smeetups | Team bi0sblr | Jan 2025 - Mar 2026 | [Link](#)

- Contributed to the **bi0s Meetups** platform by developing new pages, redesigning UI sections, and fixing frontend issues using Next.js, React, and Tailwind CSS.
- Leveraged Next.js, React, and Tailwind CSS to improve performance, maintainability, and search engine visibility

Freshness detector and quantity counter | Aug 2024 - Oct 2024

- Built an AI model for **Flipkart GRID 6.0** that detects real-time freshness of fruits and vegetables and estimates shelf-life of produce
- Outputs structured tabular data with item name, quantity, and total item count including non-edible products in real time

CERTIFICATIONS

Workshop On Cyber Security And Hacking | Nov 2023 |

Python (Basic) Certificate | Jun 2023 | Certificate ID 927101ACD6AD | [View Certificate](#)

Certification: Blockchain Basics | May 2025 | Certificate ID IIVHXTF3DF6I4 | [View Certificate](#)

EXTRA-CURRICULAR

Lead Organiser | Bi0s Cybersecurity Meetup | Jul 2025 - Present

- Led the organizing team in planning and executing monthly cybersecurity meetups, coordinating speakers, volunteers, logistics, and industry collaborations.
- Oversaw event operations to deliver engaging technical sessions and expand community participation.

Development Team Lead | Team bi0sblr | Jul 2025 - Present

- Led the bi0s-dev infrastructure and web development team, managing task allocation, code reviews, and project delivery.
- Coordinated the development and maintenance of community websites, ensuring scalable, high-quality, and timely deployments.

Junior Web Developer | Team bi0sblr | Jan 2025 - Jul 2025

- Helping the community to make / maintain websites and posters

Mentor | GirlScript Summer of Code | Jul 2025 - Oct 2025

- Mentoring fellow contributors to write and develop safe and bug free code
