

Contact:+91 9789460575 | **E-mail:**pavansarvesh31@gmail.com | **Location:**Bengaluru, Karnataka, India

Aspiring Full-Stack Developer, AI Practitioner, and Blockchain Enthusiast pursuing a B.Tech in Electronics and Computer Engineering at **Amrita Vishwa Vidyapeetham**. Skilled in developing scalable, user-centric web applications using **Next.js, React.js, TypeScript**, and modern frontend frameworks with expertise in Figma for UI/UX design and rapid prototyping. Passionate about integrating **decentralized technologies** (Solidity, Viem, Foundry) and AI/ML solutions (TensorFlow, PyTorch) to develop impactful, intelligent systems. Eager to contribute to innovative, cross-disciplinary projects that solve real-world challenges at the intersection of Web2, Web3, AI, and Blockchain.

EDUCATION

B.Tech Electronics and Computer Engineering, Amrita Viswa Vidyapeetham, Bengaluru
Sept 2023 - Present

SKILLS

Frontend Development:NextJS, Vite, Astro, JavaScript (ES6+), TypeScript, HTML5, CSS3, Tailwind CSS
Blockchain & Web3:Solidity, viem, Foundry, Hardhat
UX Design:Wireframe, Prototyping, Mockups
Backend & Databases:Node.js, PostgreSQL, Prisma
Design Tools:Figma, Adobe Photoshop
Tools:Git, GitHub, Vercel, npm/yarn
AI/ML:Python, Anaconda, Jupyter, TensorFlow, PyTorch
Other Languages:C/C++, Python, Java (Intermediate), Go (Beginner), Rust (Beginner)

PROJECTS

- Folio 2k26 - My Personal Site | 2026**
 - A fast, responsive portfolio built as a product: clear navigation, consistent sections, and performance-first UI. Built with Vite, Figma, Viem, Git, and deployed on Vercel.
- Learnify - A Learning Platform | 2025 - 2026**
 - A lightweight learning platform focused on clean navigation, readable lesson layouts, and scaling content without UI clutter. Developed using NextJS, Figma, Git, and Vercel.
- Bi0sDEV Site - Secure Development • Innovation • Excellence | 2025**
 - A public-facing team site built for credibility and maintainability: clear sections, predictable updates, and fast static delivery. Technologies: NextJS, Figma, Git, Vercel.
- Freshness detector and quantity counter | Aug 2024 - Oct 2024**
 - This AI model was built for Flipkart GRID 6.0 detects the real-time freshness of the fruit or vegetable and detects the shelf-life of the produce. The output is later given in a tabular format with item name, Quantity and the total items of any product(including non-edible items) real-time.
- Chat application using Sockets | Apr 2024 - May 2024**
 - This project is about creating a simple chat server and client using TCP/IP sockets in C. The client and server can communicate with each other by sending and receiving messages. The project aims to enable multiple users to interact simultaneously.

EXPERIENCE

- Team Lead | Bi0s Cybersecurity Meetup | Jul 2025 - Present**
 - Leading Bi0s-dev the Infra team
- Junior Web Developer | Bi0s Cybersecurity Meetup | Jan 2025 - Jul 2025**
 - Helping the community to make / maintain websites and posters
- Mentor | GirlScript Summer of Code | Jul 2025 - Oct 2025**
 - Mentoring fellow contributors to write and develop safe and bug free code
- GRC Analyst Intern | Cybersecurity-NXXT | Jun 2025 - Jun 2025**
 - Learnt about Governance, Risk and Compliance and ISO27001
 - Made my own Risk Assessment Sheet and did a sample Risk Assessment based on ISO27001

CERTIFICATIONS

Workshop On Cyber Security And Hacking | Nov 2023 |

Python (Basic) Certificate | Jun 2023 | Certificate ID 927101ACD6AD | [View Certificate](#)

Certification: Blockchain Basics | May 2025 | Certificate ID IIVHXTF3DF6I4 | [View Certificate](#)
